GOLDIN METALS

SHADE SERIES CANOPY PACKAGE

INSTALLATION

Installing a canopy can be done in many ways. Goldin Metals recommends two methods. Either cement Square Tubing directly into the ground or use bottom brackets with wedge anchors that secure the Square Tubing into an existing slab.

Use top brackets with silver bullet screws to secure your open channel to the top of your poles. The open channel acts as a base to hang Galvanized CEE purlins every four feet across the open channel on each side. Note that we can pre-punch purlins, which allows you to use bolts to secure the frame and ensure it is square.

Once your purlins are in place, lay your panels and trim atop the support, securing them with metal frame screws. Install screws directly into the purlins.

SHADE SERIES CANOPY PACKAGE

Beautify your home and protect your property with a Shade Series Canopy Package from Goldin Metals, Inc. Our experienced, professional sales staff will be happy to assist you throughout the entire process. This product should provide years of shade and protection for your enjoyment.
