**** EVERYWHERE YOU LOOK,
THERE'S ANOTHER METAL ROOF ****

Serving ALL Your Building Needs

Goldin Metals, Inc. is a leading manufacturer of Steel Roofing & Siding with four locations to serve you. Our Residential Roofing and Siding panels are highlighted in the Goldin Panel, 5V Crimp, Corrugated, and Goldin Choice Standing Seam lines. Each profile, highlighted below, offers durability and dependability and is available in a multitude of colors, and gauges, that will suit almost any need.

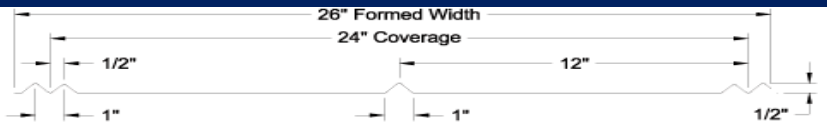

GOLDIN PANEL

The Goldin Panel's sleek and classic design has 36 inch coverage, providing energy efficiency, sustainability, virtually maintenance-free protection for your home. The panels are lightweight and strong, allowing for easy installation and increasing the lifetime of your roof.

5V CRIMP

The 5 V Crimp's ultra-low profile has 26 inch coverage and offers the look of elegance, like a standing seam profile, but at a discount. Goldin's 5 V Crimp panel incorporates a unique, historical design that will add beauty to any residential project.

There are 7 different varieties of Standing Seam Panels available in the Goldin Choice series. From the 1 inch snap seam with a slotted strip for fastening installed over solid decking to the 1 3/4 inch structural Snap Seam with clips made to span purlins, we have the right panel for the job.

There is also a mechanically seamed profile with clips available when the specifications require.

GOLDIN CHOICE STANDING SEAM

CORRUGATED

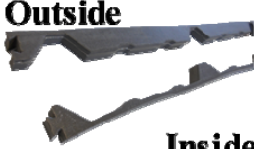

*Note that the customer stained wall Panels for an aged visual effect

The Corrugated profile offers builders a classic, Victorian style aesthetically pleasing for very visible roofs. The 24 inch coverage and design offers increased strength and durability for any project, and is well suited for both roof and wall applications.
